TRI-X Project White Paper

TRI-X Community and Utility Token ($TGOLD)

Abstract

Introducing TRI-X: A community driven Project with $TGOLD as the utility token

We're excited to announce TRI-X, a new community driven project in the crypto space.

What is $TGOLD? $TGOLD, or TRI-X Gold, is a digital asset on Binance Smart Chain. With a limited supply of just 1 million tokens, $TGOLD is considered a rare and valuable asset.

Why $TGOLD? $TGOLD is designed to increase community engagement by offering exclusive rewards and benefits. It's a community driven project with governance voting. Over 25% of the token allocation spendings will be decided by the community through voting. Your voice will be heard!

Our Commitment Our tokenomics are structured to ensure fairness, promote long-term growth, and provide tangible benefits for all community members.

Join us on this journey with TRI-X and help shape a vibrant, sustainable future. Your participation is crucial to our success!

Contents

Introduction

In the fast-paced world of blockchain, community-driven initiatives are crucial. The $TGOLD token is a key part of this strategy, designed to boost community engagement and reward loyal holders.

It's important to note that TRI-X is a community-driven project, with its success hinging on the active participation and support of the community. TRI-X and $TGOLD aim to serve as a model for how a community governed project can operate effectively.

By aligning community interests with the growth of the our ecosystem, $TGOLD helps create a beneficial relationship for everyone involved.

- $TGOLD will initially be launched as a BEP20 token on the Binance Smart Chain (BSC). Once the Trust Smart Chain (TSC) matures, offering more possibilities and enhanced functionalities for its users, we will transition to the mainnet as a TEP20 token. For more information about TSC, please visit this link. *(tscscan.io)*

Vision and Mission

Vision:
To make $TGOLD a community driven digital currency. To establish a dynamic and engaged community where every participant is acknowledged and rewarded for their contributions, driving the ecosystem toward sustained growth and innovation.

Mission:

- **Empowerment:** Enable community members to actively participate in governance and decision-making processes within our platform.
- **Incentivization:** Reward holders with $TGOLD tokens fostering loyalty and sustained engagement. Decision to migrate will be voted by the community.
- **Sustainability:** Implement robust tokenomics and economic models to ensure the long-term viability and growth of the $TGOLD token.
- **Integration:** Seamlessly incorporate $TGOLD into various facets of our platform, enhancing its utility and value proposition.

Tokenomics

Total Supply

- **Max Supply**: 1,000,000 $TGOLD tokens (One Million $TGOLD Tokens)
- **Initial Circulating Supply at TGE**: 7.5% (75.000 $TGOLD tokens)
  - **Breakdown**: 7% from Public Sales* + 0.5% KOLs allocations and Community Airdrops
    *Based on estimated public sales. It may vary depending on the actual sales.

Token Allocation

1. **Staking & Community Incentives: 30% (300,000 $TGOLD)**

   This is a substantial allocation for fostering community engagement and participation. It will ensure active involvement through staking, strategic airdrops, exclusive access, gamified challenges, social recognition, feedback incentives which are crucial for boosting the project's visibility and building a loyal user base.

2. **Public Sales**: **7%** (70.000 $TGOLD Tokens)

   o We are conducting a public sale to distribute tokens, ensuring a fair and transparent process for early investors and the broader community. Please note that the details are subject to change based on the sales.

   The vesting schedule for these sales is as follows:

   ▪ **Public Sale (100% - Unvested at TGE**)

   ▪ 100% of the generated funds will be used to buy $BNB and will be allocated to the Liquidity Pool to support the $TGOLD/$BNB trading pair, enabling smooth trading on decentralized exchanges.

3. **Development**: **18%** (180,000 $TGOLD)

   o Reserved for ongoing development, platform enhancements, and future project initiatives. This allocation is critical for the project's long-term success. The tokens are vested and released progressively, tied to milestone-specific targets, which aligns with the project's roadmap and ensures consistent progress

4. **Marketing and Partnerships**: **10%** (100,000 $TGOLD)

   o Funds dedicated to marketing campaigns, strategic partnerships, and ecosystem collaborations to expand the reach of $TGOLD and attract new users. Through this allocation, $TGOLD aims to establish brand awareness, foster community growth, and build valuable alliances within the industry.

5. **Liquidity Pool**: **20%** (200,000 $TGOLD)

   o Ensures sufficient liquidity on decentralized exchanges (DEXs) to facilitate smooth trading and reduce volatility. 100% of the funds raised from the public sales will be allocated to adding liquidity to the $TGOLD/$BNB and will be locked until we migrate to Mainnet.

   o The revenue generated through our innovative tax system will be utilized to provide additional liquidity for trading $TGOLD/$BNB in the later stages, aiming to provide min. 20% of $TGOLD to the LP.

6. **Team and Advisors**: **10%** (100,000 $TGOLD)

    o   Compensates the team and advisors, aligning their incentives with the project's success through a performance-based vesting schedule. Tokens are vested only when certain milestones are reached. Once tokens are vested, a lock-up period will prevent them from being sold immediately, providing stability and maintaining investor confidence.

7. **Reserve**: **5%** (50,000 $TGOLD)

    o   Maintained for unforeseen expenses, future development, and strategic initiatives. This provides a safety net for the project and allows for flexibility in addressing unexpected challenges, ensuring that $TGOLD can adapt effectively to market conditions and growth opportunities.

Transaction Fees

A transaction fee mechanism is implemented to sustain the ecosystem and reward holders. Fees are applied to both buy and sell transactions:

- **Buy Fee: 5%**

  50% (2.5%): Allocated to the liquidity pool to ensure market stability to maintain healthy trading environment.
  50% (2.5%): Distributed to $TGOLD holders in $TGOLD tokens

- **Sell Fee: 10%**

  Liquidity Pool (5%): Allocated to the liquidity pool that helps counteract potential price drops and supports price stability.

  Holder Rewards (2.5%): Distributed to $TGOLD holders in $TGOLD tokens (Only Staked TGOLDs will be considered for the reward distribution in the future when staking is live)

  Buyback and Burn (2.5%): A portion of the transaction fees will be used to buy back $TGOLD tokens from the market and burn them, reducing the total supply making $TGOLD a deflationary token.

  Dynamic Sell Tax: We are implementing dynamic sell taxes to protect the funds in the liquidity pool (LP) for our users. The structure will be as follows: for the first 10 days, a sell tax of 30% will be applied to mitigate volatility. Gradually, this tax

will be reduced to 10% in 3 weeks.

Advantage of Dynamic Sell Tax concept:

Mitigation of Initial Volatility, Protection of Liquidity Pool (LP), Incentivization of Long-Term Holding, Increased Revenue for the Project, Deterrence of Speculative Trading, Stable Price Discovery and Community Trust and Confidence.

Reward Mechanism from Transaction Fees

During the initial phase, $TGOLD holders will receive rewards in $TGOLD proportional to their holdings. This approach encourages active participation and long-term holding within the community.

Rewards will be distributed periodically through automated smart contracts, ensuring transparency and fairness throughout both phases.

Utility and Use Cases

1. Governance

$TGOLD holders are granted voting rights on community proposals, allowing them to influence the project's direction. They have full control over development and marketing allocations.

A significant 25% of the total supply of $TGOLD is in the hands of the community, covering development funds, marketing funds, and reserve funds.

Governance Features Include:

- **Proposal Submission:** Community members can submit proposals for new features, strategic initiatives, or changes to existing protocols. This ensures that every member has a voice in shaping the future of the project.

- **Voting Mechanism**: Each $TGOLD token represents a vote, ensuring that decisions reflect the collective will of the community. Voting processes are transparent and secure, leveraging blockchain technology to ensure fairness and integrity.
- **Implementation**: Once proposals are approved by the community, they are executed by the development team. This fosters a decentralized and democratic governance model, where the community's decisions are put into action.

Empowering the Community:

- **Direct Influence**: Community members have the power to directly influence key aspects of the project, from development priorities to marketing strategies. This

ensures that the project remains aligned with the community's interests and needs.

- **Transparency and Accountability**: All governance activities are conducted transparently, with detailed records available for review. This builds trust and ensures that all actions are accountable to the community.
- **Incentivized Participation**: Active participation in governance is encouraged through rewards and recognition. This not only motivates members to engage but also ensures that a diverse range of voices is heard.
- **Collaborative Decision-Making**: By involving the community in decision-making, we harness collective intelligence and creativity, leading to more robust and innovative solutions.

By empowering $TGOLD holders with these governance features, we aim to create a truly community-driven project where every member has the power to shape the future of the TRI-X project.

2. Community Engagement

Active participation in community-driven initiatives is rewarded, encouraging users to contribute ideas, feedback, and content. Engagement incentives include:

- **Content Creation:** Rewards for creating valuable content such as tutorials, articles, and videos that promote the TRI-X ecosystem.
- **Community Moderation:** Incentives for moderating forums and social media channels to maintain a positive and productive community environment.
- **Referral Programs:** Bonuses for referring new members to the $TGOLD ecosystem.
- **Innovative $TGOLD Star Concept:** Our new engagement points system is designed to reward you for being an active member of our community with Weekly Leaderboards.
- **Event Hosting:** Offering rewards for organizing and hosting community events, such as AMAs (Ask Me Anything), webinars, and virtual meetups.
- **Ambassador Programs:** Create ambassador roles for highly active community members who promote TRI-X and $TGOLD, offering them additional rewards and recognition.
- **Staking Rewards:** Allocate a portion of the $TGOLD tokens for staking rewards, encouraging users to lock up their tokens and support the network.

- **Competitions and Contests:** Hosting regular competitions and contests with $TGOLD rewards for winners, such as coding challenges, design contests, and community quizzes.
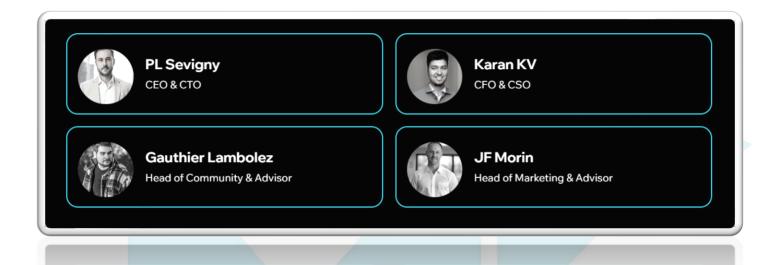

By utilizing the 30% allocation for community engagement in these ways, we can foster a vibrant, active, and loyal community that contributes to the growth and success of the TRI-X ecosystem.

Sustainable Growth Strategies for TRI-X and $TGOLD

To ensure the long-term sustainability and growth of the $TGOLD ecosystem, we are implementing the following key strategies:

- **Balanced Token Distribution**: We are committed to a fair and strategic distribution of tokens to prevent centralization and promote widespread adoption. This approach ensures that $TGOLD remains accessible and valuable to a broad user base.
- **Continuous Development**: Significant resources are allocated to ongoing development, feature enhancements, and ecosystem integrations. This commitment keeps the platform competitive and innovative, ensuring that we meet the evolving needs of our community.
- **Active Community Building**: We foster a strong and engaged community through regular communication, rewards, and inclusive governance. By actively involving our community in decision-making processes, we ensure that their voices are heard and valued.
- **Strategic Partnerships:** Collaborating with other blockchain projects, dApps, and service providers is crucial to expanding the utility and reach of $TGOLD. These partnerships enhance the ecosystem and provide additional value to our users.
- **Transparency and Trust:** We maintain transparency in all operations, financial allocations, and decision-making processes. This openness builds and retains trust within the community, ensuring that all stakeholders are informed and confident in the project's direction

By implementing these sustainable growth strategies, we aim to create a robust and resilient $TGOLD ecosystem that benefits all participants and drives the long-term success of the TRI-X project.

TEAM:

- **PL Sévigny: CEO and CTO**

  Author | Entrepreneur | Crypto Expert | Business Dev & Branding Specialist
  PL is a multi-faceted professional with expertise in entrepreneurship, market analysis, and business development. Author of the book "From Unconsciousness to Mastery," he shares his journey of transformation (published in 2023). He has founded multiple successful construction companies and serves as an advisor and mentor for young entrepreneurs through Futurpreneur Canada. As a crypto enthusiast and member of the Trias KOL's core team, he provides insights into blockchain technology. PL is also recognized for his skills in branding, strategic planning, and investment advisory, sharing valuable perspectives with thousands of followers on Twitter (@acecryptoinfo).

- **Karan KV: CFO & CSO**

  Strategy & Financial Specialist | Blockchain Enthusiast | Entrepreneur

  Karan is a skilled professional with extensive expertise in strategic planning and financial management, backed by over five years in the blockchain industry. As the CEO and Co-Founder of Brainy Assets, he showcases his entrepreneurial vision and ability to drive innovation in the e-commerce space. With a Master's degree from a German university and over a decade of experience in project and risk management at Mercedes-Benz, Kirubakaran combines technical knowledge with leadership and strategic insight. Additionally, Karan is a part of the TRIAS Team as the 'Head of Community'. Along with managing the community, he also serves as a bridge between the community and the TRIAS core team. He also serves as a

Key Opinion Leader for TRIAS.

Beyond business, Karan is a dedicated community leader, serving as a Lead Sponsor and Advisory Board Member of the Stuttgart Tamil Sangam, where he actively supports cultural and social initiatives. He now brings his passion, financial expertise, and strategic mindset to the TRI-X project, making him an invaluable addition to the team and its mission to empower the blockchain community.

- **Gauthier Lambolez: Head of Community & Member of Advisory Board**

  Blockchain Enthusiast | Educator | Communication Professional
  Gauthier is passionate about computer science and new technologies. Since discovering blockchain and cryptocurrencies in 2019, he has been deeply involved, investing and following the market daily. Driven by a genuine passion for technology, Gauthier also teaches blockchain and cryptocurrency courses at a higher education institution and applies his expertise as a communication professional in the crypto space.

- **JF Morin: Head of Advisor & Marketing Advisor**

  Entrepreneur | Marketing Specialist | Crypto Expert
  JF has over 10 years of entrepreneurial experience and 6 years in the cryptocurrency industry. As a marketing advisor, he uses his expertise to drive growth and success, specializing in digital marketing strategies and crypto projects. His passion for innovation, vision, and commitment to excellence make him a valuable asset to any team.

Roadmap

Phase 1: Website and Token Launch (Q4 2024)

- **Launch TRI-X Website:** Develop and launch a user-friendly and informative website that serves as the central hub for all TRI-X related information, updates, and resources.
- **Public Sale:** Conduct a structured public sale to distribute tokens, ensuring a fair and transparent process for early investors and the broader community.
- **Smart Contract Audit:** Perform a comprehensive audit of the smart contract by a reputable third-party security firm to ensure the highest standards of security and reliability.
- **Launch $TGOLD on Decentralized Exchanges (DEXs):** Ensure initial liquidity and accessibility for traders and investors.
- **Initiate Community-Building Campaigns:** Utilize social media, forums, and influencer partnerships to build awareness and attract early adopters.
- **Airdrop Distribution:** Conduct strategic airdrops to reward early supporters and incentivize initial engagement.

Phase 2: Reward Distribution (Q1 2025)

- **Implement Automated Reward Distribution:** Develop and deploy smart contracts to facilitate the automatic distribution of $TGOLD rewards to holders.
- **Expand Reward Mechanisms:** Introduce additional reward tiers and incentives for consistent holding and active participation within the community

Phase 3: Governance Implementation (Q1-Q2 2025)

- **Launch Governance Platform:** Develop and deploy the governance framework, allowing $TGOLD holders to propose and vote on initiatives.
- **Host Community Voting Events:** Organize regular voting events to engage the community and make collective decisions.
-

- **Implement Approved Proposals:** Execute successful proposals, demonstrating the effectiveness of decentralized governance.

Phase 4: Expanding Use Cases (Q2 2025)

- **Introduce New Partnerships and Integrations:** Collaborate with other projects to expand the utility and reach of $TGOLD.
- **Enhance Utility within TRI-X Ecosystem:** Integrate $TGOLD into more services and offerings within our ecosystem, increasing its practical applications.
- **Migration to TEP20 Token Standard:** Transition the $TGOLD token to the TEP20 standard, enabling seamless integration with the NetX ecosystem.
- **Development of a DEX:** We will be utilizing some % of the development funds upon approval through the community governance to develop a DEX on NetX Mainnet.
- **Centralized Exchange (CEX) Listings:** Pursue listings on major centralized exchanges to increase liquidity and accessibility.

Phase 5: Ecosystem Expansion (Q3 2025)

- **Develop Advanced Features:** Implement advanced functionalities such as enhanced security features and user-friendly interfaces to improve the overall user experience.
- **Global Community Outreach:** Expand marketing efforts to reach a global audience, fostering a diverse and inclusive community.
- **Sustainability Initiatives:** Launch initiatives focused on environmental sustainability, community welfare, and long-term project viability.

Security and Compliance

Ensuring the security and compliance of the $TGOLD token is paramount to maintaining trust and safeguarding the ecosystem.

Measures include:

- **Smart Contract Audits:** Conduct thorough audits of all smart contracts by reputable third-party security firms to identify and mitigate vulnerabilities.
- **Transparent Operations:** Maintain transparency in financial transactions, token distribution, and project developments through regular updates and open communication channels.

- **Community Security Education:** Educate the community on best security practices to prevent phishing, scams, and other malicious activities.

Conclusion

The TRI-X project with its token ($TGOLD) presents a compelling opportunity for users to engage deeply with the TRI-X platform while earning valuable rewards. By fostering a participatory and incentivized community, $TGOLD aims to drive the growth, sustainability, and innovation. The comprehensive tokenomics ensures a balanced and robust economic model that benefits all stakeholders. With the planned migration to the TEP20 standard, $TGOLD holders will continue to receive rewards in $TGOLD and possibly in NetX utility tokens, further integrating the token into the NetX ecosystem. Join us in revolutionizing community engagement and shaping the future of decentralized ecosystems!

Call to Action

Be part of the revolution! Join the TRI-X community and secure your $TGOLD tokens today. Follow us on our social media channels, participate in our community events, and stay tuned for the upcoming token launch. Together, let's build a dynamic, engaged, and rewarding community that propels the TRI-X ecosystem to new heights!
